Questionnaire for Thursday January 12

Please email your responses in advance of class or bring in hard copy to class.

Full name:

Preferred name (if different) & any pronunciation advice:

What brings you to this class? What do you hope to get out of this class?

Tell me a little about your background. I am interested especially in exposure to math, life sciences, engineering, intellectual property, and the like. Do you have an undergraduate major or other relevant educational background, work experience, or life experience, that might be relevant, and that you would like me to know about? Any exposure to FDA or the industries it regulates? (**Please note, a science background is not necessary. I was a history major.)

What non-required courses (if any) have you taken so far, at the law school?
